SUMMARY

Backend engineer and applied ML researcher across distributed systems, agentic AI pipelines, and cloud-native infrastructure. Architected LSTM-based anomaly detection over WPA3-SAE handshake sequences; engineered a multi-agent autonomous cybersecurity framework with real-time threat classification. Hands-on with FastAPI, Docker, Kubernetes, and MLOps. GSSoC open-source contributor. 400+ LeetCode problems solved.

EDUCATION

Manipal University Jaipur — B.Tech CSE (IoT Specialization) | CGPA: 8.01

(Aug 2023–May 2027)

TECHNICAL SKILLS

- **Languages:** Go, Python, Java, TypeScript, JavaScript, C++, SQL
- **Backend:** FastAPI, Node.js, gRPC, REST APIs, Distributed Systems, Microservices
- **AI/ML:** LLM Applications, LangGraph, CrewAI, RAG, ChromaDB, Qdrant
- **Cloud & DevOps:** AWS, GCP, Azure, Docker, Kubernetes, CI/CD, Linux
- **Data Infrastructure:** PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Kafka, NATS JetStream, Snowflake

WORK EXPERIENCE

Open Source Contributor | GSSoC 2026 — Remote

- Contributed backend and ML-adjacent patches to open source repositories under the GSSoC program; reviewed codebases, triaged issues, and shipped production-grade pull requests across the cohort.

Algorithmic Trading Competitor | IMC Prosperity 3 & 4 — Remote

- Engineered a Python-based quantitative trading strategy with adaptive EMAs, OTM spread farming, and position tracker correction across multi-product markets (ASH_COATED_OSMIUM, INTARIAN_PEPPER_ROOT).
- Diagnosed and resolved critical strategy bugs including fair value misalignment, order budget overflows, and position divergence through deep log and CSV analysis.

PROJECTS

[Tulos E-Commerce App \(GitHub\)](#) Next.js, TypeScript, Tailwind CSS, Sanity CMS, REST APIs, Vercel

- Production-ready e-commerce platform with dynamic product catalogs, SSR-powered product pages, cart functionality, and CMS-driven content management enabling real-time product updates.

[StreamTube – One OTT for Everyone \(GitHub\)](#) Next.js, TypeScript, Tailwind CSS, REST APIs, Vercel

- OTT-style streaming application integrating third-party movie APIs with dynamic routing, category filtering, client-side caching, and optimized data fetching for seamless content discovery.

[Studio Speaks \(GitHub\)](#) React, JavaScript, Tailwind CSS, REST APIs

- Responsive business platform featuring scalable component architecture, interactive UI modules, and optimized frontend performance for maintainable production deployment.
-

[Blue Berry Berry or NOTHING \(GitHub\)](#) Next.js, TypeScript, React, Tailwind CSS, Vercel

- Modern product-focused web platform built with reusable components, responsive layouts, and optimized asset delivery to achieve fast page loads and enhanced user experience.

ACHIEVEMENTS

- Solved **400+ problems** on [LeetCode](#), 100+ on GFG, and 150+ on CodeStudio
- NPTEL Elite — Design and Analysis of Algorithms
- Secured **4th position** at [SJMSOM](#), IIT Bombay competition
